Notes to Interim Financial Statements

1. Nature of Operations and Going Concern

Indicator Minerals Inc. ("Indicator" or the "Company") is an exploration stage enterprise and is currently exploring its mineral interests in Nunavut, Canada in order to bring the properties to the extraction and processing stage. The Company is listed on the TSX Venture Exchange ("TSX-V") and trades under the symbol IME.

The Company is an exploration stage company that engages principally in the acquisition, exploration and development of mineral properties. The Company has a history of operating losses and has an accumulated deficit of \$10,082,706 at May 31, 2009 (November 30, 2008 - \$9,531,189). As an exploration stage company, it is currently unable to self-finance its operations. The development of the Company's resource properties is dependent on the ability of the Company to raise sufficient capital to finance its operations through a combination of equity offerings, joint venture arrangements and the sale of properties.

These financial statements have been prepared in accordance with Canadian Generally Accepted Accounting Principles ("GAAP") and on a basis which assumes that the Company will be able to continue its operation as a going concern for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of business. Management recognizes that the Company will need to generate additional financial resources in order to meet its planned business objectives and to continue as a going concern. There can be no assurance that such resources will be available on acceptable terms or at all. If the Company is unable to obtain adequate additional financing, the Company will be required to curtail its operations and exploration activities.

These financial statements do not include any adjustments relating to the recorded amounts and classification of assets and liabilities should the Company be unable to continue as a going concern.

2. Basis of Presentation

The Company prepares its interim financial statements in accordance with Canadian generally accepted accounting principles on a basis consistent with those used and described in the annual financial statements for the year ended November 30. The disclosures contained in these interim financial statements do not include all the requirements of Canadian generally accepted accounting principles for annual financial statements, and accordingly, these interim financial statements should be read in conjunction with the annual financial statements for the year ended November 30. Certain comparative figures have been restated to conform to the current period's financial statement presentation.

3. Adoption of New Accounting Standards

- (a) On December 1, 2008 the Company adopted Section 3064, Goodwill and Intangible Assets issued by the Canadian Institute of Chartered Accountants ("CICA"). This standard provides guidance on the recognition, measurements, presentation and disclosure of goodwill and intangible assets. Section 3064 requires the expensing of start-up costs unless those costs satisfy specific capitalization criteria. Concurrent with the adoption of this standard, EIC-27, "Revenues and Expenditures in the Pre-operating Period," was withdrawn. Section 3064 is effective for annual or interim periods beginning on or after October 1, 2008. The adoption of this Standard had no impact on the Company's financial statements.

3. Adoption of New Accounting Standards – Continued

(b) Future Changes in Accounting Standards

International Financial Reporting Standards ("IFRS")

The CICA has announced it will transition Canadian GAAP for publicly accountable enterprises to IFRS. Under the terms of the transition rules, the Company's financial statements are to be prepared in accordance with IFRS for the fiscal year commencing on December 1, 2011. While the Company has begun assessing the potential impact of the adoption of IFRS in 2011, the financial reporting impact of the transition to IFRS cannot be reasonably estimated at this time.

4. Financial Instruments

The Company's financial instrument assets consist of cash and cash equivalents and short-term investments, which are designated as held for trading and measured at fair value; marketable securities, which are classified as available-for-sale and measured at fair value; and cash calls receivable, GST recoverable, and permit bonds receivable, which are designated as loans and receivables and are measured at amortized cost. Financial instrument liabilities are accounts payable and accrued liabilities which are designated as other liabilities and measured at amortized cost. The fair values of these financial instruments approximate their carrying values due to the short-term nature of these investments and/or the ability for prompt liquidation. Marketable securities are recorded at market value based on quoted market prices of the common shares held in another public company.

The Company is exposed to credit and liquidity risk with respect to its financial instruments. It is management's opinion that the Company is not exposed to significant interest, foreign exchange or commodity risks arising from its financial instruments.

Credit risk

Credit risk is the risk of potential loss to the Company if a counterparty to a financial instrument fails to meet its contractual obligations. The Company's credit risk is primarily attributable to its cash and cash equivalents, short-term investments and amounts receivable. The Company limits exposure to credit risk arising from its cash and cash equivalents by maintaining its cash and cash equivalents with high credit quality financial institutions.

The Company's cash calls receivable is from one joint exploration partner. The Company has experienced no bad debts resulting from transactions with this partner.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations and commitments as they become due. The Company ensures that there is sufficient working capital in order to meet short term business requirements. The Company's cash and cash equivalents and short term investments are highly liquid and available on demand to meet the Company's ongoing obligations. The Company's accounts payable and accrued liabilities are all due within several months.

6. Permit Deposits and Permit Bonds Receivable

Prospecting permit deposits are paid to the Receiver General for Canada and recoverable based on exploration spending and filing of requisite geological assessment reports. If the spending commitments are not met, the deposits are forfeited.

The Company has been filing reports with the federal authorities. These reports may result in a refund of amounts paid by the Company. Any such proceeds result in a reduction in the amount recorded for permits with any non-refunded amounts being either written off or transferred to resource property costs.

Permit bonds receivable reflects the amount of deposits receivable for geological assessment reports accepted by the federal authorities, for which refunds are anticipated in the current year.

b) **Hunter Properties**

General

The Company owns an 80% interest in the diamond rights of several properties, including 4 prospecting permits and 500 mineral claims acquired from Hunter Exploration Group ("Hunter"), an arms length party. Hunter retains a 20% carried interest in the properties until a feasibility study is completed. The properties are located near the communities of Kugaaruk and Taloyoak in Nunavut Territory. The properties are subject to a gross overriding royalty of up to 2%. The Company pays an annual advance royalty of \$25,000 to each of Hunter and International Royalty Corp., should the Company elect to retain any of the original properties subject to the Hunter agreement.

Darby

On June 2, 2006 the Company entered into an agreement with Teck Cominco Limited ("Teck Cominco") whereby Teck Cominco has the option to earn a 51% interest in the diamond rights of the Company's 80% owned Darby Project, which is part of the Hunter properties, by spending \$14 million over four years, including reimbursement of limited expenditures by the Company on the property, prior to 200%. The Company had been operating the exploration activities on the Darby properties for Teck Cominco under a service contract that was renewable annually and was incurring the exploration expenditures and being reimbursed by Teck Cominco monthly. The Company was receiving a 10% administrative fee on all disbursements in addition to payment for all overhead directly attributable to the project. As of February 26, 2007, Teck Cominco became the operator of the project. It is estimated that during the year ended November 30, 2008, Teck Cominco surpassed the \$14,000,000 in aggregate exploration spending required for it to earn an undivided 51% interest in the Darby Project; however, no accounting of expenditures has been received by the Company for review and therefore no interest in the project has been assigned to Teck Cominco as at May 31, 2009.

Once Teck Cominco has earned its 51% interest a joint venture is to be formed and the following items will apply:

- While Teck Cominco owns at least a 51% interest in the Darby Project, it will be obliged to carry Indicator's remaining 29% share of exploration expenses through to mine production on a project loan basis. Indicator will be required to repay the loan only in the event of cash flow from the project.
- Teck Cominco will propose a minimum program of \$2.5 million per year to advance the project.
- Indicator will have the right to purchase Teck Cominco's interest in the project, under certain circumstances, if Teck Cominco elects not to develop a mine.

Nanuq North

Under the terms of a letter agreement entered into in 2005, the Company has a 40% interest in 16 core claims covering 11,605 hectares (the "Core Claims"). Peregrine Diamonds Ltd. has a 40% interest and Hunter a 20% interest. Exploration costs on the Core Claims are currently funded on a 50/50 basis by Peregrine and the Company. Hunter's 20% interest is carried through to completion of a scoping study. Peregrine and the Company each have an undivided 50% interest in the remaining 21,451 hectares of claims at Nanuq North.

c) **CBR Gold Corp.**

The Company and CBR Gold Corp. (formerly Committee Bay), a company with directors in common, finalized agreements in 2006 for three properties, named Borden, Kellet and TIM. In order to earn a 51% interest in the Borden and Kellet properties and a 35% interest in the TIM property, the Company is required to incur costs equal to or greater than the performance bond required over the term of the subject prospecting permits and to incur the staking costs for the associated mineral claims in the final year of the permits.

c) CBR Gold Corp. - Continued

The Company can then earn a further 19% interest in the Borden and Kellet properties and a further 4% interest in the TIM property by spending \$6 per acre and \$3 per acre, respectively, (minimum of \$4,153,290) over the first two years after staking the claims. Upon earning a 70% interest in the Borden and Kellet properties, the Company and CBR will split diamond exploration costs 80%/20%, respectively. Upon earning a 39% interest in the TIM property, and Company, CBR, and CBR's joint venture partner will split diamond exploration costs 44%/5%/51%, respectively. The properties included in the agreement are located in the Kivalliq region of Nunavut. The properties are subject to a gross overriding royalty of up to 2% of production.

d) Indicator Properties

The Company has several 100% owned grass roots properties across the Nunavut Territory. The most notable of these properties is the Dorset Project located on the Foxe Peninsula of Baffin Island. To date, the Company has spent \$222,685 on the Dorset Project and \$1,322,430 on the rest of the properties. Each of the grassroots properties held by the Company is being evaluated with heavy mineral sampling in an effort to confirm the presence of kimberlite, the primary source of diamond, and to isolate the general location of the kimberlites.

e) Marketing Agreement

On March 12, 2008 the Company signed an agreement with Munic Gems N.V. ("Munic Gems") under which Munic Gems will use its best efforts to bring project opportunities to the Company for review with a particular focus on India and Brazil. Munic Gems will retain the following rights on certain projects that they have brought to the Company:

- The right to act as agent on the sale of 50% of Indicator's share of diamond production at a commission of 5%
- A Net Profits Interest (NPI) of 5%.

The Company will continue to generate and acquire projects through its own efforts. Munic Gems will have the following rights on these projects as long as it earns and maintains a 9.9% ownership interest in the common shares of the Company:

- The right to act as agent on 20% of the Company's share of diamond production at a commission of 5%
- The first right-of-offer to underwrite 100% of the Company's share of debt financing for capital costs incurred after the completion of a bankable feasibility study. In exchange, Munic Gems will have the right to market 100% of the Company's share of diamond production for the term of the debt at a commission of 5%.

Under the terms of the Agreement, Munic Gems was required to earn a 9.9% ownership interest in the Company through Private Placement financings at the Company's discretion, beginning with the purchase of 2.5 million units of the Company within 60 days of the Agreement being signed. This initial financing was completed in May 2008 (*Note 9b*) and each unit consisted of one common share and one warrant to purchase one common share. Each unit in the initial financing was priced at \$0.29, and with the exercise price of each warrant being \$0.36.

Once Munic Gems has earned a 9.9% interest in the Company, it is to maintain the 9.9% ownership through the exercise of an anti-dilution right on subsequent financings. Munic Gems maintains the anti-dilution right so long as it does not skip more than three financings in total and does not skip two consecutively

At May 31, 2009 the Company has not acquired any projects under the terms of this agreement.

d) Stock Options

The Company has established a stock option plan (the "Plan") for directors, employees, and consultants of the Company. From time to time, shares may be reserved by the Board, in its discretion, for options under the Plan, provided that at the time of the grant, the total number of shares so reserved for issuance by the Board shall not exceed 10% of the issued and outstanding listed shares (on a non-diluted basis) as at the date of grant. No options shall be granted, without regulatory approval, entitling any single individual to purchase in excess of 5% of the then outstanding shares in the Company in any 12 month period and no more than 2% of the optioned shares may be issued to any one consultant in any 12 month period. If the option rights granted under the plan shall expire or terminate for any reason without having been exercised such optioned shares may be made available for other options to be granted under the plan. The shares so reserved by the Board under the Plan shall be authorized but unissued shares.
