Indicator Minerals Inc.

(An Exploration Stage Company)

Notes to Financial Statements

For the Three and Nine Month Periods Ended August 31, 2010 and 2009

Canadian Dollars (Unaudited)

1. Nature of Operations and Going Concern

Indicator Minerals Inc. ("Indicator" or the "Company") is an exploration stage enterprise and is currently exploring its mineral interests in Nunavut, Canada and Colombia with the objective of bringing the properties to the extraction and processing stage. The Company is listed on the TSX Venture Exchange ("TSX-V") and trades under the symbol IME.

The Company is in the process of exploring its mineral resource properties and has not yet determined whether these properties contain economically recoverable mineral reserves. The recoverability of the amounts capitalized to resource property costs is ultimately dependant upon the existence of economically recoverable ore reserves, securing and maintaining title and beneficial interest in the properties, obtaining necessary financing to continue to explore and develop the properties, and upon future profitable production or proceeds from disposition of the mineral properties. The amounts shown as resource property costs represent costs incurred to date, less amounts recovered from third parties and/or written-off, and do not necessarily represent present or future fair values.

These financial statements have been prepared in accordance with Canadian Generally Accepted Accounting Principles ("GAAP") and on a basis which assumes that the Company will be able to continue its operation as a going concern for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of business.

The Company has a history of losses with no operating revenue, other than interest income which raises substantial doubt about the Company's ability to continue as a going concern. The Company has forecast financial results and cash flows for the next year. The forecast is based on management's best estimates of operating conditions in the context of current economic conditions and today's capital market climate. Based on its forecast, the Company expects that sufficient liquidity and equity financing is available to meet its obligations over the next year.

The ability of the Company to carry out its planned business objectives and continue as a going concern is dependent on its ability to raise adequate financing from lenders, shareholders and other investors and/or generate operating profitability and positive cash flow from its mineral resource properties. There can be no assurances that the Company will continue to obtain the additional financial resources necessary and/or achieve profitability or positive cash flows from its future operations. If the Company is unable to obtain adequate additional financing, the Company would be required to curtail its planned operations, exploration and development activities.

The financial statements do not include any adjustments relating to the recorded amounts and classification of assets and liabilities should the Company be unable to continue as a going concern.

2. Significant Accounting Policies

The Company prepares its interim financial statements in accordance with Canadian generally accepted accounting principles on a basis consistent with those used and described in the annual financial statements for the year ended November 30, 2009. The disclosures contained in these interim financial statements do not include all the requirements of Canadian generally accepted accounting principles for annual financial statements, and accordingly, these interim financial statements should be read in conjunction with the annual financial statements for the year ended November 30, 2009. Certain comparative figures have been restated to conform to the current period's financial statements presentation.

Indicator Minerals Inc.

(An Exploration Stage Company)

Notes to Financial Statements

For the Three and Nine Month Periods Ended August 31, 2010 and 2009

Canadian Dollars (Unaudited)

3. Adoption of New and Future Changes in Accounting Standards

Future Changes in Accounting Standards

International Financial Reporting Standards ("IFRS")

The CICA has announced it will transition Canadian GAAP for publicly accountable enterprises to IFRS. Under the terms of the transition rules, the Company's financial statements are to be prepared in accordance with IFRS for the fiscal year commencing on December 1, 2011 with restatement of the Company's November 30, 2011 comparative figures. While the Company has begun assessing the potential impact of the adoption of IFRS in 2011, the financial reporting impact of the transition to IFRS cannot be reasonably estimated at this time.

4. Capital Disclosures and Financial Instruments

a) Capital Disclosures

The Company's objective when managing capital is to safeguard the Company's ability to continue as a going concern, so that it can continue to explore and develop its projects for the benefit of its shareholders and other stakeholders. The Company considers the components of shareholders' equity, and debt (if any), as capital. The Company manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets. Since the Company is in the exploration stage, the Company may issue new shares through private placements in order to maintain or adjust the capital structure.

In order to facilitate the management of its capital requirements, the Company prepares annual expenditure budgets that are updated as necessary depending on various factors, including successful capital deployment and general industry conditions. The Company has completed an equity financing in 2010, which together with the existing working capital and further equity financings is expected to be sufficient to meet its corporate overhead expenses and required exploration expenditures through the end of fiscal 2010, based on current plans. (See also note 13).

There were no changes to the Company's approach to capital management during the three and nine months ended August 31, 2010 and 2009. The Company is not subject to externally imposed capital requirements as at August 31, 2010.

b) Financial Instruments

The Company's financial instrument assets consist of cash and cash equivalents, which are designated as held for trading and measured at fair value (level one of the fair value hierarchy in CICA Section 3862); marketable securities, which are classified as available-for-sale and measured at fair value; and cash calls receivable, GST recoverable, and permit bonds receivable, which are designated as loans and receivables and are measured at amortized cost. Financial instrument liabilities are accounts payable and accrued liabilities which are designated as other liabilities and measured at amortized cost. The fair values of these financial instruments approximate their carrying values due to the short-term nature of these investments and/or the ability for prompt liquidation. Marketable securities are recorded at market value based on quoted market prices of the common shares held in another public company, which is consistent with level one of the fair value hierarchy.

Indicator Minerals Inc.

(An Exploration Stage Company)

Notes to Financial Statements

For the Three and Nine Month Periods Ended August 31, 2010 and 2009

Canadian Dollars (Unaudited)

4. Capital Disclosures and Financial Instruments - Continued

b) Financial Instruments - Continued

The Company is exposed to credit and liquidity risk with respect to its financial instruments. It is management's opinion that the Company is not exposed to significant interest, foreign exchange or commodity risks arising from its financial instruments.

Credit risk

Credit risk is the risk of potential loss to the Company if a counterparty to a financial instrument fails to meet its contractual obligations. The Company's credit risk is primarily attributable to its cash and cash equivalents, short-term investments and amounts receivable. The Company limits exposure to credit risk arising from its cash and cash equivalents by maintaining its cash and cash equivalents with high credit quality financial institutions.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations and commitments as they become due. The Company ensures that there is sufficient working capital in order to meet short term business requirements. The Company's cash and cash equivalents and short term investments are highly liquid and available on demand to meet the Company's ongoing obligations. The Company's accounts payable and accrued liabilities are all due within several months. See also note 1 to the financial statements.

5. Marketable Securities

	At August 31, 2010 (Unaudited)		At November 30, 2009 (Audited)	
	Market Value	Cost	Market Value	Cost
Common shares of a public company, representing less than a 5% interest in the company	\$2,500	\$27,500	\$3,125	\$27,500

6. Permit Deposits and Permit Bonds Receivable

Prospecting permit deposits are paid to the Receiver General for Canada and recoverable based on exploration spending and filing of requisite geological assessment reports. If the spending commitments are not met, the deposits are forfeited.

The Company has been filing reports with the federal authorities. These reports may result in a refund of amounts paid by the Company. Any such proceeds result in a reduction in the amount recorded for permits with any non-refunded amounts being either written off or transferred to resource property costs.

Permit bonds receivable reflects the amount of deposits receivable for geological assessment reports accepted by the federal authorities, for which refunds are anticipated in the current year.

Indicator Minerals Inc.
(An Exploration Stage Company)
Notes to Financial Statements

For the Three and Nine Month Periods Ended August 31, 2010 and 2009

Canadian Dollars (Unaudited)

7. Loan Receivable

The loan to Bluestone Resources Inc. ("Bluestone") is repayable on demand and bears interest at Canadian Western Bank prime plus 3.0% per annum.

The loan agreement with Bluestone provides for a loan up to a total of \$200,000 in order to make certain payments on Bluestone's properties necessary to keep them in good order and to cover transaction expenses (see also Note 14 subsequent events). The loan is secured by all of Bluestone's assets and by a pledge on the shares of Bluestone's Arizona subsidiary. The loan is convertible into shares of Bluestone at the election of Indicator.

8. Equipment

Details are as follows:

	At August 31, 2010 (Unaudited)			At November 30, 2009 (Audited)

	\$ 322,694	\$ 216,196	\$ 103,498	\$ 315,544	\$ 193,644	\$ 121,900

9. Option Agreement

Rio Verde Property

On November 20, 2009 the Company entered into a Letter Agreement whereby it was granted the right to acquire a 60% interest in Rio Verde Enterprises Inc. ("Rio Verde"), a private Canadian Company entitled to acquire Colombian emeralds and export such emeralds.

Under the terms of the Letter Agreement (as amended), the Company had until February 28, 2010 for initial due diligence. On March 4, 2010 the Company announced it had completed its due diligence review and has elected to proceed with the Letter Agreement subject to financing. There is no formal commitment to this funding.

Under the terms of the Letter Agreement on April 5, 2010, the Company issued 100,000 common shares to Rio Verde and must by August 31, 2011 fund an aggregate of \$1,000,000 including \$500,000 on exploration and development and \$500,000 on marketing and sales.

Upon completion of the initial 18 month period on August 31, 2011, Indicator will have the right to purchase a 60% share ownership of Rio Verde by investing \$5,000,000 into Rio Verde and issuing a further 2.4 million common shares to Rio Verde. In addition, the Company will have a onetime right to extend the Evaluation Period by an additional 18 months under certain conditions that include an additional \$1,000,000 evaluation expenditure.

Amounts written off during the year ended November 30, 2009 related to cost capitalized on certain claims where the Company has chosen not to renew its prospecting permits.

b) **Hunter Properties**

General

The Company owns an 80% interest in the diamond rights of several properties, acquired from Hunter Exploration Group ("Hunter"), an arm's length party. Hunter retains a 20% carried interest in the properties until a feasibility study is completed. The properties are located near the communities of Kugaaruk and Taloyoak in Nunavut Territory. The properties are subject to a gross overriding royalty of up to 2%. The Company pays an annual advance royalty of \$25,000 to each of Hunter and Royal Gold Inc. (formerly International Royalty Corp.), should the Company elect to retain any of the original properties subject to the Hunter agreement.

Indicator Minerals Inc.
(An Exploration Stage Company)
Notes to Financial Statements

For the Three and Nine Month Periods Ended August 31, 2010 and 2009

Canadian Dollars (Unaudited)

10. Resource Property Costs - Continued

b) Hunter Properties - Continued

Darby

On June 2, 2006 the Company entered into an agreement with Teck Resources Ltd. (formerly Teck Cominco Limited ("Teck") whereby Teck has the option to earn a 51% interest in the diamond rights of the Company's 80% owned Darby Project, which is part of the Hunter properties, by spending \$14 million over four years, including reimbursement of limited expenditures by the Company on the property, prior to June 2, 2009. The Company had been operating the exploration activities on the Darby properties for Teck under a service contract that was renewable annually and was incurring the exploration expenditures and being reimbursed by Teck monthly. The Company was receiving a 10% administrative fee on all disbursements in addition to payment for all overhead directly attributable to the project. As of February 26, 2007, Teck became the operator of the project. It is estimated that during the year ended November 30, 2008, Teck surpassed the \$14,000,000 in aggregate exploration spending required for it to earn an undivided 51% interest in the Darby Project; however, no accounting of expenditures has been received by the Company for review and therefore no interest in the project has been assigned to Teck as at August 31, 2010.

Once Teck has earned its 51% interest a joint venture is to be formed and the following items will apply:

- While Teck owns at least a 51% interest in the Darby Project, it will be obliged to carry Indicator's remaining 29% share of exploration expenses through to mine production on a project loan basis. Indicator will be required to repay the loan only in the event of cash flow from the project.
- Teck will propose a minimum program of \$2.5 million per year to advance the project.
- Indicator will have the right to purchase Teck interest in the project, under certain circumstances, if Teck elects not to develop a mine.

In August of 2010 Teck formally vested its 51% interest in the project. No exploration work was carried out on the Project in 2009 and only care and maintenance of the project was conducted in 2010. The core mineral claims at Darby will remain in good standing well into 2011; so, there is no concern that valuable land will lapse while the partnership evaluates the options for proceeding in the future. None of the other terms of the agreement have been fulfilled.

Nanuq North

Under the terms of a letter agreement entered into in 2005, the Company has a 40% interest in 16 core claims covering 11,605 hectares (the "Core Claims"). Peregrine Diamonds Ltd. ("Peregrine") has a 40% interest and Hunter a 20% interest. Exploration costs on the Core Claims are currently funded on a 50/50 basis by Peregrine and the Company. Hunter's 20% interest is carried through to completion of a scoping study. Peregrine and the Company each have an undivided 50% interest in the remaining 21,451 hectares of claims at Nanuq North.

On July 7, 2009 the Company, as operator of the Nanuq North Project gave notice to Peregrine and Hunter of its intention to proceed with a 2009 exploration program with a budget of \$2.34 million. On July 12, 2009 Peregrine advised Indicator that it had commenced arbitration proceedings to assess whether the Company has the right to unilaterally implement the program and require Peregrine to contribute 50% of planned expenditures.

b) Hunter Properties - *Continued*

Nanuq North - *Continued*

The Statement of Claim submitted by Peregrine to the Arbitration Centre asserts that the Company does not have the right to set exploration programs and budgets on Nanuq North without the approval of Peregrine. Peregrine is also seeking an award of costs, in an amount that cannot be quantified at this time.

On July 24, 2009 the Company and Hunter each filed a statement of defense and counterclaim. In its counterclaim, the Company asserts that the Letter Agreement between the Company, Hunter and Peregrine is unenforceable and should be set aside. Hunter is seeking the same outcome in an independent counterclaim.

On April 30, 2010 the Company announced that it had reached an agreement with Peregrine Diamonds Ltd. to adjourn arbitration hearings scheduled for May 2010 involving the Nanuq North Project in order to allow Indicator and Peregrine to negotiate a Joint Venture Agreement with respect to the Nanuq North Project. As a term of the Adjournment Agreement, Indicator and Peregrine have agreed to conduct a \$2.0 million exploration program at Nanuq North in 2010. This exploration program was conducted in late May and June 2010.

On June 30, 2010 the company announced that it had completed the drilling program on the diamondiferous NQN-001 kimberlite at the Nanuq North Project and that more than four tonnes of kimberlite had been obtained for diamond analysis.

Grail

The Grail Project (a combination of the Sanagak and Mayo Projects) is located on the Boothia Peninsula and originally included approximately 1.1 million acres of prospecting permits. In 2004, heavy mineral samples were collected on the project on a 3km by 3km grid. Kimberlite indicator minerals have been recovered in five spatially separate locations.

One of the five areas where high chrome, low calcium G10 pyrope garnet was recovered is adjacent to the eastern boundary of the prospecting permits. Heavy mineral samples were collected on the open ground to the east of the Grail Project early in the 2005 exploration season. These samples were expedited to the laboratory where processing began immediately. Results were received in time to initiate a staking campaign that captured over 100,000 acres where indicator minerals with diamond inclusion chemistry were recovered.

In 2006 additional heavy mineral samples were collected in areas where kimberlite indicator minerals had been identified in previous sampling campaigns. Results from work carried out in 2005 isolated an area where the company believes kimberlite sources may exist.

The 2007 exploration program included a detailed airborne geophysical survey over a small portion of the project thought to be the source area for one of the indicator mineral anomalies. Several anomalies were selected from the preliminary airborne data to be surveyed with ground geophysics. Finally, a summer program of heavy mineral sampling was conducted to further delineate the areas where kimberlite indicator minerals have been recovered.

b) Hunter Properties - *Continued*

Grail – *Continued*

In 2008 Indicator initiated an airborne survey of an area of the Grail Project thought to host the sources of the kimberlite indicator minerals recovered on the property. Numerous kimberlite targets were identified in the data and the project is now considered drill ready.

In fall of 2009, Indicator staked an additional 16 claims encompassing 41,320 acres of land contiguous to the Grail property. This acquisition was for the purposes of securing strategic ground in close proximity to positive results returned from previous exploration campaigns.

As a result of focussed exploration, the project is now 236,000 acres. No work was conducted on the Project in 2010.

c) North Country Gold Corp.

The Company and North Country Gold Corp. (formerly CBR Gold Corp.), a company with directors in common, finalized agreements in 2006 for three properties, named Borden, Kellet and TIM. In order to earn a 51% interest in the Borden and Kellet properties and a 35% interest in the TIM property, the Company is required to incur costs equal to or greater than the performance bond required over the term of the subject prospecting permits and to incur the staking costs for the associated mineral claims in the final year of the permits. The TIM and Kellet properties have since been abandoned.

The Company can then earn a further 19% interest in the Borden property by spending \$6 per acre over the first two years after staking the claims in December 2008. Upon earning a 70% interest in the Borden property, the Company and CBR will split diamond exploration costs 80%/20% respectively. The property included in the agreement is located in the Kivalliq region of Nunavut. The Borden property is subject to a gross overriding royalty of up to 1% of production.

d) Indicator Properties

The Company has several 100% owned grass roots properties across the Nunavut Territory. The most notable of these properties is the Dorset Project located on the Foxe Peninsula of Baffin Island. As at August 31, 2010, the Company has capitalized \$363,172 on the Dorset Project. Each of the grassroots properties held by the Company are being evaluated with heavy mineral sampling in an effort to confirm the presence of kimberlite, the primary source of diamond, and to isolate the general location of the kimberlites.

e) Marketing Agreement

On March 12, 2008 the Company signed an agreement with Munic Gems N.V. ("Munic Gems") under which Munic Gems will use its best efforts to bring project opportunities to the Company for review with a particular focus on India and Brazil. Munic Gems will retain the following rights on certain projects that they have brought to the Company:

- The right to act as agent on the sale of 50% of Indicator's share of diamond production at a commission of 5%
- A Net Profits Interest (NPI) of 5%.

Indicator Minerals Inc.
(An Exploration Stage Company)

Notes to Financial Statements

For the Three and Nine Month Periods Ended August 31, 2010 and 2009

Canadian Dollars (Unaudited)

10. Resource Property Costs – Continued

e) Marketing Agreement – Continued

The Company will continue to generate and acquire projects through its own efforts. Munic Gems will have the following rights on these projects as long as it earns and maintains a 9.9% ownership interest in the common shares of the Company:

- The right to act as agent on 20% of the Company's share of diamond production at a commission of 5%
- The first right-of-offer to underwrite 100% of the Company's share of debt financing for capital costs incurred after the completion of a bankable feasibility study. In exchange, Munic Gems will have the right to market 100% of the Company's share of diamond production for the term of the debt at a commission of 5%.

Under the terms of the Agreement, Munic Gems was required to earn a 9.9% ownership interest in the Company through Private Placement financings at the Company's discretion, beginning with the purchase of 2.5 million units of the Company within 60 days of the Agreement being signed. This initial financing was completed in May 2008 and each unit consisted of one common share and one warrant to purchase one common share. Each unit in the initial financing was priced at \$0.29, with the exercise price of each warrant being \$0.36.

Once Munic Gems has earned a 9.9% interest in the Company, it is to maintain the 9.9% ownership through the exercise of anti-dilution right on subsequent financings. Munic Gems maintains the anti-dilution right so long as it does not skip more than three financings in total and does not skip two consecutively. Although Munic Gems is in default of this agreement, the Company has not at this time exercised the dilution right.

At August 31, 2010 the Company has not acquired any projects under the terms of this agreement.

b) Private Placements

Private Placement June and July 2010

During June and July 2010 the Company completed two tranches of a non-brokered private placement. The private placement consisted of 2,037,500 non flow-through units at a price of \$0.12 per unit for total gross proceeds of \$244,500 and 10,000,000 flow-through units at a price of \$0.15 per unit for total gross proceeds of \$1,500,000. Each non-flow through unit consisted of one non flow-through common share and one share purchase warrant entitling the holder to purchase one common share at a price of \$0.16 per share until July 14, 2012. The warrants are subject to an acceleration provision in the event the closing price of the Company's shares on the TSX Venture Exchange exceeds \$0.30 for at least 10 consecutive trading days. An amount of \$95,092 was allocated to the fair value of these warrants on a pro-rata basis. Each flow-through unit consisted of one flow-through common share and one share purchase warrant entitling the holder to purchase one common share at \$0.20 per share until June 17, 2012. The warrants are subject to the same acceleration provision that applies to the non flow-through units. An amount of \$515,373 was allocated to the fair market value of the warrants on a pro-rata basis.

Finder's fees and expenses relating to the issue were paid in cash totaling \$90,714 and 700,000 finder's units and 5,950 non-transferrable agents warrants were issued. Each finder's unit is comprised of an option to purchase one common share of the Company at a price of \$0.15 until June 17, 2010 and one quarter of one non-transferrable share purchase warrant of the Company. Each whole warrant is exercisable to purchase one common share of the Company at a price of \$0.20 until June 17, 2012. These warrants are subject to the same acceleration provision as the units issued above. An amount of \$95,560 was allocated to the fair value of the finder's units on a pro-rata basis.

The non-transferrable agents warrants enable the holder to purchase one common share at a price of \$0.16 per share until July 14, 2012. The warrants are subject to an acceleration provision in the event the closing price on the TSX Venture Exchange exceeds \$0.24 for at least 10 consecutive trading days. An amount of \$454 was allocated to the fair value of the warrants on a pro-rata basis.

Private Placement April and May 2010

During April and May 2010 the Company completed two tranches of a non-brokered private placement. The private placement consisted of 10,288,750 non flow-through units at a price of \$0.08 per unit for total gross proceeds of \$823,100 and 5,985,000 flow-through units at a price of \$0.10 per unit for total gross proceeds of \$598,500. Each non flow-through unit consisted of one common share and one non transferable share purchase warrant entitling the holder to purchase one common share at \$0.12 per share. 8,997,500 of these warrants expire on April 28, 2012 and 1,291,250 on May 5, 2012. An amount of \$327,366 was allocated to these warrants on a pro-rata basis. Each flow-through unit consisted of one common share and one non transferrable share purchase warrant entitling the holder to purchase one common share at \$0.15 per share. 4,270,000 of these warrants expire on April 28, 2012 and 1,715,000 on May 5, 2012. An amount of \$232,906 was allocated to the fair value of the warrants on a pro-rata basis.

The fair value of agents fees and expenses related to the private placement totalled \$162,701, of which \$97,774 was allocated to the proceeds from the share issuance and the remaining \$64,927 was allocated to contribute surplus as a cost of the warrants issued. The agents fees and expenses are comprised of \$61,348 in cash payments, 1,032,288 warrants (with a fair value of \$84,894), and 107,975 common shares (with a fair value of \$16,459). Each Agent Warrant

entitles the holder to purchase one common share at a price of \$0.15. 773,900 of the Agent Warrants expire on April 28, 2012 and 258,388 expire on May 5, 2012.

Private Placement August 2009

During August 2009, the Company completed the first tranche of a non-brokered private placement. The private placement consisted of 8,330,000 non flow-through units at a price of \$0.10 per unit, for total gross proceeds of \$833,000 and 713,000 flow-through units at a price of \$0.13 per unit for total gross proceeds of \$92,690. Each non flow-through unit consisted of one common share and one non transferrable share purchase warrant entitling the holder to purchase one common share at \$0.20 per share until August 10, 2011. An amount of \$374,462 was allocated to the fair value of the warrants on a pro rata basis. Each flow-through unit consisted of one common share and one half of one non transferrable share purchase warrant entitling the holder to purchase one half of one common share at \$0.20 per share until August 10, 2011. An amount of \$16,026 was allocated to the fair value of the warrants on a pro rata basis.

Agents fees and expenses relating to the issue were paid in cash totalling \$17,853 and 172,060 agents warrants were issued which had a fair value of \$7,734. The agents warrants entitle the holder to purchase one common share at \$0.20 until August 10, 2011.

d) Stock Options

The Company has established a stock option plan (the "Plan") for directors, employees, and consultants of the Company. From time to time, shares may be reserved by the Board, in its discretion, for options under the Plan, provided that at the time of the grant, the total number of shares so reserved for issuance by the Board shall not exceed 10% of the issued and outstanding listed shares (on a non-diluted basis) as at the date of grant. No options shall be granted, without regulatory approval, entitling any single individual to purchase in excess of 5% of the then outstanding shares in the Company in any 12 month period and no more than 2% of the optioned shares may be issued to any one consultant in any 12 month period. If the option rights granted under the Plan shall expire or terminate for any reason without having been exercised such optioned shares may be made available for other options to be granted under the Plan. The shares so reserved by the Board under the Plan shall be authorized but unissued shares.

The options are non-transferable and will expire, if not exercised, immediately upon dismissal by the Company with cause or 90 days following the date the optionee otherwise ceases to be a director, officer, manager, consultant or employee of the corporation for reasons other than death, or one year after the death of an optionee. Pursuant to the policies of the TSX-V options granted pursuant to the Plan in excess of 10% of the issued and outstanding common shares at the time of the grant must be subject to vesting.

	Number	Weighted Average Exercise Price

13. Commitments

Lease Commitment:

The Company signed a lease for a period of 44 months for office premises effective April 1, 2009 and has lease commitments as follows:

Remainder of	2010	\$	21,500
	2011		73,139
	2012		<u>68,399</u>
		\$	<u>163,038</u>

14. Subsequent events

a) Proposed acquisition and amalgamation of Bluestone Resources Inc. (``Bluestone``)

In August 2010 the Company signed a letter of Intent to acquire all of the issued and outstanding shares of Bluestone Resources Inc., a private company with a 100% interest in the drill-ready Mohave Copper-Moly-Silver Porphyry Project, Mohave County, Arizona.

Pursuant to the transaction, Indicator will issue 0.62854 common shares in its capital in exchange for each outstanding share of Bluestone, resulting in Indicator issuing approximately 5,000,000 common shares, equal to approximately 4.7% of its issued and outstanding shares after giving effect to such issuance.

To facilitate this transaction Indicator entered into a loan agreement with Bluestone (see Note 7). The President and Vice-President Exploration, both directors of Indicator, are each directors and shareholders of Bluestone and would be entitled to receive 314,270 and 377,124 Indicator shares respectively on closing of the transaction. In addition, two other directors of Indicator are non-material shareholders of Bluestone.

b) Private Placement

On October 13, 2010 the Company announced that it intends to complete a non-brokered private placement of up to \$400,000, comprised of units at a price of \$0.08 per unit, subject to TSX Venture Exchange approval.

Each unit will consist of one common share and one common share purchase warrant. Each common share purchase warrant will be exercisable into one common share for a period of 24 months from closing at a price of \$0.12 per share, subject to an acceleration provision in the event the closing price of the Company's shares on the Exchange is \$0.16 or greater for at least 10 consecutive trading days.
