

BLUESTONE RESOURCES INC.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF THE FINANCIAL POSITION AND RESULTS OF OPERATIONS FOR THE THREE AND SIX MONTHS ENDED JUNE 30, 2021

The following Management's Discussion and Analysis ("MD&A") of the financial condition and results of operations of Bluestone Resources Inc. ("Bluestone" or the "Company") constitutes management's review of the factors that affected the Company's financial and operating performance for the six months ended June 30, 2021. The MD&A was prepared as of August 17, 2021, and should be read with the unaudited condensed interim consolidated financial statements and related notes for the six months ended June 30, 2021, which can be found along with other information of the Company on SEDAR at www.sedar.com. All figures are in United States ("U.S.") dollars unless otherwise stated. References to C\$ are to Canadian dollars. The financial statements have been prepared in accordance with International Accounting Standard 34, *Interim Financial Reporting* of International Financial Reporting Standards as issued by the International Accounting Standards Board ("IFRS").

Forward-Looking Statements

This MD&A contains "forward-looking information" within the meaning of Canadian securities legislation and "forward-looking statements" within the meaning of the United States Private Securities Litigation Reform Act of 1995 (collectively, "forward-looking statements"). All statements, other than statements of historical fact, which address activities, events or developments that management believes, expects or anticipates will or may occur in the future are forward-looking statements and often use words such as "expects", "plans", "anticipates", "estimates", "intends", "may" or variations thereof or the negative of any of these terms. Forward-looking statements contained in this MD&A include, but are not limited to statements with respect to the conversion of Inferred Mineral Resources; increasing the amount of Measured and Indicated Mineral Resources; the proposed timeline and benefits of further drilling; the timing of commercial production at the Company's Cerro Blanco Gold Project ("Cerro Blanco") and the generation of material revenue by the Company; the objectives and benefits of the preliminary economic assessment on Cerro Blanco titled "Cerro Blanco Project, District of Jutiapa, Guatemala: N.I. 43-101 Technical Report & Preliminary Economic Assessment" dated February 28, 2021, and filed on the Company's profile at www.sedar.com on April 13, 2021 (the "PEA"); statements about the Company's plans for its mineral properties; Bluestone's business strategy, plans and outlook; the future financial or operating performance of Bluestone; capital expenditures, corporate general and administration expenses and exploration and evaluation expenses; expected working capital requirements; proposed production timelines and rates; funding availability; the potential impact of the novel coronavirus ("COVID-19") on the Company and its operations; and future exploration and operating plans.

All forward-looking statements are made based on management's current beliefs, as well as various assumptions made by them and information currently available to them. Generally, these assumptions include, among others: the ability of Bluestone to carry on exploration and development activities; the price of gold, silver and other metals; there being no material variations in the current tax and regulatory environment; the exchange rates among the Canadian dollar, Guatemalan quetzal and the U.S. dollar remaining consistent with current levels; the presence of and continuity of metals at Cerro Blanco at estimated grades; the availability of personnel, property, plant and equipment at estimated prices and within estimated delivery times; metals sales prices and exchange rates assumed; appropriate discount rates applied to the cash flows in economic analysis; tax rates and royalty rates applicable to the proposed mining operation; and the availability of acceptable financing.

Forward-Looking Statements (cont'd)

Forward-looking statements are subject to a number of risks and uncertainties that may cause the actual results of the Company to differ materially from those discussed in the forward-looking statements and, even if such actual results are realized or substantially realized, there can be no assurance that they will have the expected consequences to, or effects on, Bluestone. Factors that could cause actual results or events to differ materially from current expectations are included under the heading "*Risks and Uncertainties*" in this MD&A in addition to risks and uncertainties related to expected production rates, timing and amount of production and total costs of production; risks associated with technical difficulties in connection with mining development activities; risks and uncertainties related to the accuracy of estimates of future production, future cash flow, total costs of production and diminishing quantities or grades of Mineral Resources; and risks and uncertainties related to interruptions in production.

Any forward-looking statement speaks only as of the date on which it was made, and, except as may be required by applicable securities laws, Bluestone disclaims any intent or obligation to update any forward-looking statement, whether as a result of new information, future events or results or otherwise. There can be no assurance that forward-looking statements will prove to be accurate, and actual results and future events could differ materially from those anticipated in such statements.

Qualified Person

The scientific and technical disclosure in this MD&A has been reviewed and approved by David Cass, P.Geo., Vice President Exploration, who is a Qualified Person as defined by National Instrument 43-101 - Standards of Disclosure for Mineral Projects ("N.I. 43-101").

Overview

Bluestone is a natural resource company focused on the exploration and development of its 100% owned Cerro Blanco Gold Project and Mita Geothermal Project ("Mita Geothermal"). Cerro Blanco is a proposed open pit gold mining operation located in southeast Guatemala approximately 160 kilometers by road from the capital, Guatemala City. Mita Geothermal is a geothermal energy resource located adjacent to Cerro Blanco. The Company's head and registered office is located at 2000 - 885 West Georgia Street, Vancouver, BC, V6C 3E8. The Company's common shares are listed on the TSX Venture Exchange ("TSXV"), trading under the symbol 'BSR', and on the OTCQB, trading under the symbol 'BBSRF'.

Highlights for the Three Months Ended June 30, 2021

- On June 28, 2021, the Company provided an update on progress at Cerro Blanco, including progress on its feasibility study, environmental & permitting baseline data and local skills development training & capacity building.
- On June 14, 2021, the Company announced assay results from the 2021 infill drill campaign at Cerro Blanco that focused on the Salinas silica cap, including 140.2 m grading 1.1 g/t Au and 8.2 g/t Ag.
- The annual general and special meeting of shareholders was held on May 19, 2021. After the meeting, William Lamb was appointed by the Company's Board of Directors as Chair.
- On May 4, 2021, the Company announced drill results which included 28.6 m grading 11.6 g/t Au and 217.6 m grading 1.4 g/t Au.

Project Updates

Cerro Blanco

The Company has one principal mining property interest, namely Cerro Blanco, an advanced stage near surface development project located in southern Guatemala. Entre Mares de Guatemala S.A. ("Entre Mares"), a wholly-owned subsidiary of the Company, is the 100% owner of Cerro Blanco.

In the first quarter of 2021, the Company made a strategic decision to capitalize on Cerro Blanco's near-surface, high-grade mineralization through an open pit development scenario. This change in corporate strategy was transformative, and effectively doubled the gold resource ounces and production profile which tripled the NPV_{5%} (after-tax) of the project to \$907 million. Cerro Blanco is now an asset capable of producing over 300,000 ounces of gold and 1.0 million ounces of silver per year. The new project will contribute significantly more to local stakeholders through employment, economic benefits, and taxes.

The Company has been focused on advancing key initiatives that include a feasibility study, permitting and capacity building in the communities within the area of influence in preparation for development.

Feasibility study

Site general arrangement drawings that will finalize layouts for the project are nearing completion. Mine design activities have progressed including a mine plan optimization exercise based on the PEA that incorporated a trade-off analysis in plant throughput. The study indicated that through better management of lower grade material and improved scheduling throughout the life of mine, a reduction in plant size could be achieved while maintaining a similar production profile and net present value. Mine mobile equipment selection has started and requests for proposals will go out in the third quarter of 2021.

Additional metallurgical studies are underway focusing on the upper Salinas unit utilizing drill core from the recently completed drill program. A potential opportunity to increase the final grind size is being investigated which would improve operability and lower the number of filters required for dry stack tailings.

Permitting and environmental baseline data

During 2021 Q2, the Company advanced permitting initiatives with the national authorities. The collection of dry season data has been completed and wet season data collection is underway. A new social baseline study was conducted to improve the understanding of the current socio-economic status of the local communities.

The Company is updating the environmental impact assessment to capture the new mining method through an updated environmental management plan as set out by Guatemalan Law. While aspects of the project layout will increase in size, fundamental design characteristics are expected to have moderate modifications. This includes the processing plant, dry stack tailings, water management, infrastructure, transmission line and facilities.

Local Skills Development Training and Capacity Building

The Company announced a partnership with a nationally accredited Guatemalan institution which is a recognized leader in job skills training as an accredited vocational school and has played an important role in skills development in Guatemala. Through our partnership, the Company will be offering technical training courses to members of the local communities in preparation for mine development. Programs and certifications particular to the construction and operations phases include masonry, carpentry, mechanics, technicians, and welding. Courses range on average from 12 to 18 months in duration and will help prepare for early works.

Project Updates (cont'd)

In addition to job skills training, the Company is undertaking an adult education program with the National Government and local educational institutions aimed at enhancing the social and economic conditions of the communities within the project area of influence, to improve eligibility for future employment and/or entrepreneurship. These skills are aimed at literacy and education levels to meet entry requirements for job skills training programs.

Drilling update

On June 14, 2021, the Company reported assay results from its 2021 infill drill campaign at Cerro Blanco that focused on the Salinas silica cap, a layer of near-surface, low-grade disseminated mineralization some 100-150 meters thick that overlies the high-grade quartz-adularia vein swarms. This recent drilling was undertaken to support the upcoming feasibility study.

A total of 52 holes were reported, comprising a total of 6,724 meters, including assays from the recent sampling of four holes drilled in late 2020. Highlights include the following drilled intercepts:

- 140.2 meters grading 1.1 g/t Au and 8.2 g/t Ag (CB21-469)
- 57.6 meters grading 3.1 g/t Au and 9.9 g/t Ag (CB21-460)
- 150.1 meters grading 0.8 g/t Au and 5.4 g/t Ag (CB21-479)
- 189.3 meters grading 0.8 g/t Au and 2.5 g/t Ag (CB21-429)
- 7.6 meters grading 30.2 g/t Au and 85.5 g/t Ag (CB21-487)

The infill drill program was successfully completed on schedule and will contribute to a new Mineral Resource estimation (announced on July 19, 2021). The primary objective of the drill program was to increase the density of drillholes within the Salinas unit and potentially upgrade the current Mineral Resource to a higher classification.

Update on COVID-19 response

In March 2020, the World Health Organization declared a global pandemic related to COVID-19. The health and safety of the Company's employees and communities is, and will always be, a top priority and the Company will continue to take the necessary steps and actions to ensure their well-being. The Company is closely monitoring COVID-19 developments, including the potential impact on the Company's operations. Due to the ongoing uncertainty resulting from COVID-19, the Company's operations and/or timelines could be impacted in a number of ways including, but not limited to: a reduction of activity at Cerro Blanco; disruptions to supply chains; worker absenteeism due to illness; and disruption to the progress of feasibility study work, permit approvals, project financing and construction. These possible impacts could result from government directives, the need to modify work practices to meet appropriate health and safety standards and other COVID-19 related impacts on the availability of labour or to the supply chain.

Project Updates (cont'd)***Mita Geothermal***

The Company owns a 100% interest in Mita Geothermal through its wholly-owned subsidiary, Geotermia Oriental de Guatemala, S.A. ("Geotermia"). Mita Geothermal is a geothermal energy resource located adjacent to Cerro Blanco and is 7 km from the Pan American Highway near the town of Asuncion Mita, in the region of Jutiapa in Guatemala. In November of 2015, the Government of Guatemala granted Geotermia a 50-year license to build and operate up to a 50-megawatt geothermal plant.

In line with Bluestone's commitment to responsible development and reducing our carbon footprint with the development of the mine, the Company has undertaken additional work on the Mita Geothermal project in 2021. The Company completed a scoping study that incorporated a review of the historical data and testwork completed on the project. An updated reservoir calculation was completed that estimated a reserve capacity of over 20 MW. The scoping study focused on several different sizing scenarios ranging from 5 MW to 20 MW, and the results highlighted an economic project with an after-tax internal rate of return of over 15%. Next steps include geological and geophysical surveys to further refine injection well locations alongside the proven production wells, followed by a feasibility study.

It is currently forecasted that Guatemala's energy matrix will transition to a more renewable mix as Guatemala is committed to promoting more renewable energy and expanding the regional market. It is expected that greater private sector engagement will carry out projects of generation and transmission through the development of public-private partnerships. The Company continues to evaluate advancement options for Mita Geothermal as these developments occur.

Results of Operations for the Three Months Ended June 30, 2021 Compared to the Three Months Ended June 30, 2020

The Company's net loss for the three months ended June 30, 2021, totaled \$7,537,260 or \$0.05 per share as compared to a net loss of \$5,582,153 or \$0.05 per share for the three months ended June 30, 2020. Significant expenditures and variances are as follows:

	Three Months Ended June 30, 2021	Three Months Ended June 30, 2020	(Increase) Decrease in Net Loss
Exploration and evaluation expenses ⁽¹⁾	\$5,158,765	\$3,933,364	(\$1,225,401)
General and administration			
Advertising and promotion	69,497	69,846	349

Current liabilities	2,732,570	2,407,236	2,980,812	3,035,421	2,575,705	12,050,213	3,621,810	2,096,774
Working capital	39,447,169	47,101,070	47,517,685	53,893,790	59,145,632	(5,837,599)	(122,490)	6,051,540
Net loss	(7,537,260)	(7,279,660)	(9,560,183)	(8,639,298)	(5,582,153)	(6,901,328)	(7,012,413)	(5,852,904)
Basic and diluted loss per share	(0.05)	(0.05)	(0.07)	(0.06)	(0.05)	(0.08)	(0.09)	(0.07)
Weighted avg. shares outstanding	150,144,563	144,961,360	143,538,463	143,231,017	120,661,470	82,412,067	81,898,123	81,898,123

The Company completed an equity financing on May 1, 2020, which resulted in increases to total assets, working capital and shares outstanding. During the three months ended March 31, 2020, loans totaling \$10.0 million were drawn from a credit facility, resulting in an increase to current liabilities. These loans were repaid in May 2020. Quarterly results mainly fluctuate due to the level of exploration and evaluation activities, such as drilling programs and basic engineering activities, and fluctuations in the C\$/US\$ rate. There are no seasonal fluctuations in the results for the presented periods.

Liquidity and Capital Resources

Cash decreased by \$7,805,753 during the six months ended June 30, 2021, from \$49,334,074 as at December 31, 2020, to \$41,528,321 as at June 30, 2021. Cash utilized in operating activities during the six months ended June 30, 2021, was \$13,034,962 (six months ended June 30, 2020 - \$11,917,952). Cash utilized in investing activities during the six months ended June 30, 2021, was \$3,958,899 (six months ended June 30, 2020 - cash generated of \$33,145), mainly for the acquisition of property, plant and equipment. During the six months ended June 30, 2021, the Company generated cash from financing activities, mainly from the exercise of warrants, of \$8,565,517 compared to \$68,271,610 during the six months ended June 30, 2020, which was mainly from a bought deal equity financing.

As at June 30, 2021, share capital was \$178,385,235 and was comprised of 150,158,483 issued and outstanding common shares (December 31, 2020 - \$168,677,315 comprised of 143,547,376 shares outstanding). The increase in outstanding common shares during the six months ended June 30, 2021, was mainly the result of the exercising of warrants and stock options. Reserves, which increased due to the vesting of stock options, were \$10,773,156 (December 31, 2020 - \$10,702,958). As a result of the net loss for the six months ended June 30, 2021, the deficit at June 30, 2021, increased to \$131,347,235 from \$116,530,315 at December 31, 2020. Accordingly, shareholders' equity on June 30, 2021, was \$70,046,230 compared to \$73,654,973 at December 31, 2020.

At present, the Company's operations do not generate cash inflows and its financial success is dependent on its ability to advance Cerro Blanco and Mita Geothermal. This can take many years and is subject to factors that are beyond the Company's control. See "*Risks and Uncertainties*".

In order to finance the Company's operations, the Company has raised money through the sale of equity instruments, the exercise of convertible securities and drawing from a credit facility. Many factors influence the Company's ability to raise funds, including the health of the resource market, the climate for mineral exploration and resource development investments, the Company's track record, the economics of the PEA and the experience and caliber of its management. Actual funding requirements may vary from those planned due to a number of factors, including the progress and results of drilling activities. Management believes it will be able to raise equity capital and/or debt as required but recognizes there will be risks involved that may be beyond its control.

Risks and Uncertainties

The Company is subject to a number of risks and uncertainties including, but not limited to the following:

- Operations in Guatemala
- Global epidemics or pandemics or other health crises
- Licenses and title to assets
- Maintaining and obtaining licenses and permits
- Environmental hazards
- Governmental laws and regulations
- Community action
- Uncertainty of development projects
- Estimates of Mineral Resources
- Preliminary nature of the PEA
- The business of exploration for minerals and mining involves a high degree of risk
- Anti-corruption laws
- Tax risks
- Reliance on third parties and risk associated with foreign subsidiaries
- Property commitments
- Limited operational history
- Substantial capital requirements
- Acquisition risk
- Future sales or issuances of common shares
- Competition
- Dependence on key personnel
- Changes in climate conditions
- Control person of the Company
- Public company requirements
- Marketability of natural resources
- Conflicts of interest
- Uninsurable risks
- Infrastructure
- Price volatility of publicly traded securities
- Risk of fines and penalties
- The successful development of Cerro Blanco and Mita Geothermal cannot be guaranteed
- Information technology security risks
- Litigation risk
- Share price risk

An analysis of these risks and uncertainties, as they have the potential to impact the Company, can be found in the Company's Annual Information Form and MD&A for the year ended December 31, 2020. The risks and uncertainties have not changed from those disclosed in the Company's Annual Information Form and MD&A for the twelve months ended December 31, 2020.

Outstanding Share Data

Bluestone's authorized capital consists of an unlimited number of common shares and an unlimited number of preferred shares without par value. No preferred shares have been issued to date. The following common shares and stock options are outstanding as at August 17, 2021:

	Number of Shares	Exercise Price C\$	Remaining life (years)
Issued and Outstanding Common Shares	150,158,483		
Stock options	7,733,000	1.15 - 1.89	0.45 - 4.59
Fully diluted at August 17, 2021	157,891,483		

Off Balance Sheet Arrangements

The Company does not utilize off balance sheet arrangements.

Transactions with Related Parties

Key management compensation

Key management personnel include those persons having authority and responsibility for planning, directing and controlling the activities of the Company. The Company has determined that key management personnel consist of certain executive and non-executive members of the Company's Board of Directors and corporate officers. The remuneration of key management personnel included in the consolidated statements of loss were as follows:

	Three Months Ended June 30, 2021	Three Months Ended June 30, 2020	Six Months Ended June 30, 2021	Six Months Ended June 30, 2020
Salaries	\$349,138	\$472,682	\$818,776	\$1,124,214
Share-based compensation	439,399	450,731	1,012,445	642,061
	\$788,537	\$923,413	\$1,831,221	\$1,766,275

Accrued compensation due to key management as at June 30, 2021, was \$271,301 (December 31, 2020 - \$637,763).

Related party expenses

During the three and six months ended June 30, 2021, the Company incurred \$87,678 and \$173,744, respectively, in office facilities and services expenses pursuant to an agreement with Namdo Management Services Ltd. ("Namdo"). An officer of the Company is the owner of Namdo as of January 1, 2021.

Financial Instruments and Financial Risk Management

A description of the Company's financial instruments and financial risk management can be found in notes 8 and 9, respectively, of the Company's condensed interim consolidated financial statements for the six months ended June 30, 2021.

Significant Accounting Policies, Estimates and Judgments

A description of the Company's significant accounting policies, estimates and judgments, can be found in note 2, of the Company's audited consolidated financial statements for the year ended December 31, 2020.

New Standards and Interpretations Not Yet Adopted

A description of the International Accounting Standards Board's new standards and interpretations not yet adopted by the Company can be found in note 2(q) of the Company's audited consolidated financial statements for the year ended December 31, 2020.

Disclosure of Internal Controls

Management has established processes to provide them with sufficient knowledge to support representations that they have exercised reasonable diligence that: (i) the condensed interim consolidated financial statements for the six months ended June 30, 2021, do not contain any untrue statement of material fact or omit to state a material fact required to be stated or that is necessary to make a statement not misleading in light of the circumstances under which it is made, and (ii) the condensed interim consolidated financial statements for the six months ended June 30, 2021, fairly present in all material respects the financial condition, results of operations and cash flow of the Company.

In contrast to the certificate required for non-venture issuers under National Instrument 52-109 – Certification of Disclosure in Issuers' Annual and Interim Filings ("NI 52-109"), the Venture Issuer Basic Certificate does not include representations relating to the establishment and maintenance of disclosure controls and procedures ("DC&P") and internal control over financial reporting ("ICFR"), as defined in NI 52-109. In particular, the certifying officers filing the certificate are not making any representations relating to the establishment and maintenance of:

1. Controls and other procedures designed to provide reasonable assurance that information required to be disclosed by the issuer in its annual filings, interim filings or other reports filed or submitted under securities legislation is recorded, processed, summarized and reported within the time periods specified in securities legislation; and
2. A process to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with the issuer's generally accepted accounting principles.

The issuer's certifying officers are responsible for ensuring that processes are in place to provide them with sufficient knowledge to support the representations they are making in the certificate. Investors should be aware that inherent limitations on the ability of certifying officers of a venture issuer to design and implement on a cost-effective basis DC&P and ICFR as defined in NI 52-109 may result in additional risks to the quality, reliability, transparency and timeliness of interim and annual filings and other reports provided under securities legislation.

Approval

The Board of Directors of Bluestone has approved the disclosure contained in this MD&A on August 17, 2021. A copy of this MD&A will be provided to anyone who requests it.
